

## ORPC Celebrates 4<sup>th</sup> of July With a Float in the Eastport Parade

Ocean Renewable Power Company proudly participated in the celebration by building and driving an ORPC Maine float in the annual parade. The ORPC float contained an early version of ORPC tidal turbine and was enthusiastically welcomed by the crowd of over 10,000 people. Chris Sauer and John Ferland manned the float while throwing candy to the crowd. Our Eastport General Manager, Bob Lewis, and his wife Patricia drove the float and took excellent photographs and video footage of the event. The float was a huge success and a great reminder of ORPC's commitment to the Eastport community. We look forward to next year!
